Lenz and Bijmans to chair Eurovent PG-AHU

Brussels, 28 November 2023. The Eurovent Product Group 'Air Handling Units' re-elected Martin Lenz (TROX) as the group's Chairperson and Andy Bijmans (Systemair) as its Vice-Chairperson. The election took place during the group's last meeting in Hinwil.

Participants of the Eurovent Product Group 'Air Handling Units' (PG-AHU) re-elected Martin Lenz, Head of International Business Development / Head of Research and Pre-Development at TROX GmbH (Germany) as the group's Chairperson during the group's recent meeting in Hinwil. Martin will continue to be supported by Andy Bijmans, Manager R&D at Systemair (Netherlands) who was also re-elected as Vice-Chairperson of the group. Martin and Andy were both initially elected to chair the group in 2017, due to their broad experience and knowledge in the air handling sector and look forward to continuing the task for the next two years.

Martin Lenz, Chairperson of PG-AHU, indicated: "In today's world, air handling units are an important part of ensuring the quality of life in buildings. At the same time, climate change requires highly efficient and sustainable HVAC systems and components. For PG-AHU, this means a clear focus on technological progress in terms of quality for a long lifetime, energy efficiency and material efficiency. I am convinced that with the strong participation of AHU manufacturers in the PG-AHU, we will successfully overcome these challenging issues."

Andy Bijmans, Vice-Chairperson of PG-AHU, added: "I am looking forward that we, as a Product Group with very active members, can together serve the market expectations from our end-users, concerning the three main items of the moment, Indoor Air Quality, energy efficiency and sustainability in all aspects of air handling units, such as reliable technique, construction, (European) regulations and norms."

The Eurovent Product Group 'Air Handling Units' covers air handling units for non-residential purposes. It deals with air handling units and their components (e.g. air filters, energy recovery components, fans), often in cooperation with the specialist Eurovent Product Groups that cover specific components. The group's key tasks involve advocating European and national legislative initiatives on this subject, developing EN, ISO and Eurovent standards, general promotion of the industry and export initiatives, and diminishment of unfair trade barriers inside and outside Europe.

About Eurovent

Eurovent is Europe's Industry Association for Indoor Climate (HVAC), Process Cooling, and Food Cold Chain Technologies. Its members from throughout Europe represent more than 1.000 organisations, the majority small and medium-sized manufacturers. Based on objective and verifiable data, these account for a combined annual turnover of more than 30bn EUR, employing around 150.000 people within the association's geographic area. This makes Eurovent one of the largest cross-regional industry committees of its kind. The organisation's activities are based on highly valued democratic decision-making principles, ensuring a level playing field for the entire industry independent from organisation sizes or membership fees.

Our Member Associations

Our Member Associations are major national sector associations from Europe that represent manufacturers in the area of Indoor Climate (HVAC), Process Cooling, Food Cold Chain, and Industrial Ventilation technologies.

The more than 1.000 manufacturers within our network (Eurovent 'Affiliated Manufacturers' and 'Corresponding Members') are represented in Eurovent activities in a democratic and transparent manner.
